

Three Mobile Protect

Security. Wherever business takes you.

Statistics tell us that mobile devices are the new frontier for cybercrime.

Don't chance it. Be the one whose business is protected.

Keep your devices, data, and privacy secure with Three Mobile Protect.

Powered by

A mobile user is 18 times more likely to be exposed to a phishing attempt than a laptop user.

(Wandera Mobile phishing report 2018)

A UK business is victim to a successful cyber-attack every 19 seconds.

(Hiscox Insurance 2021 Cyber Report)

The average annual cost to a UK business to repair the damage and data loss resulting from a cyber-attack is £13,400.

(UK Gov Cyber Security survey 2021)

Safer, smarter mobile security

Your work phone isn't just for calls and texts.

It holds valuable data, business sensitive and personal information.

Why wouldn't you secure it? Especially when you consider that mobile users are now more likely to suffer a cyber-attack than those using a laptop.

Three Mobile Protect provides all the security you need, as well as allowing usage control on all your team phones. It's not just for you, but for all your employees.

Protect your business from cybercrime in all its forms, and rest easy that you won't pay later.

Security

Stops phishing, malware, and data loss on all company devices.

Compliance

Filters out malicious content and unofficial apps. Limit access to non-work content.

Control

Set data caps at home and while roaming. Staff can define policies, for the office and beyond.

Simplicity

No management or admin. Just a simple, one-time set up for IOS and Android.

Privacy

Fully protects employee privacy. All security is handled at device level.
